

The Story Behind **DRUMOLOGY**

Drumology has happened to be a free floating platform where I'm happily free to take all my wildest musical ideas and bring them into life. It is a platform that stand's for free flowing creativity in a real moment, where improvisation and hunting the unknown has come together in one. Coming from the jazz background heavily influenced by the artist's from the early era of jazz up until the experimental area of today's music all condensed in a Drumology world. Dreamy melancholic yet uplifting flying harmonic soundscapes, post-jazzy sounding sculptures of the songs and unpredictable rhythmic explorations is what describes the palette of colours used in the world of Drumology.

Drumology represents the freedom of exploration in real time.

Hlboko zakorenený koncept improvizáčnej tradície jazzovej hudby až po dnešné experimentálne hudobné prostredie – to všetko skondenzované vo svete Drumology.
